Lab 04

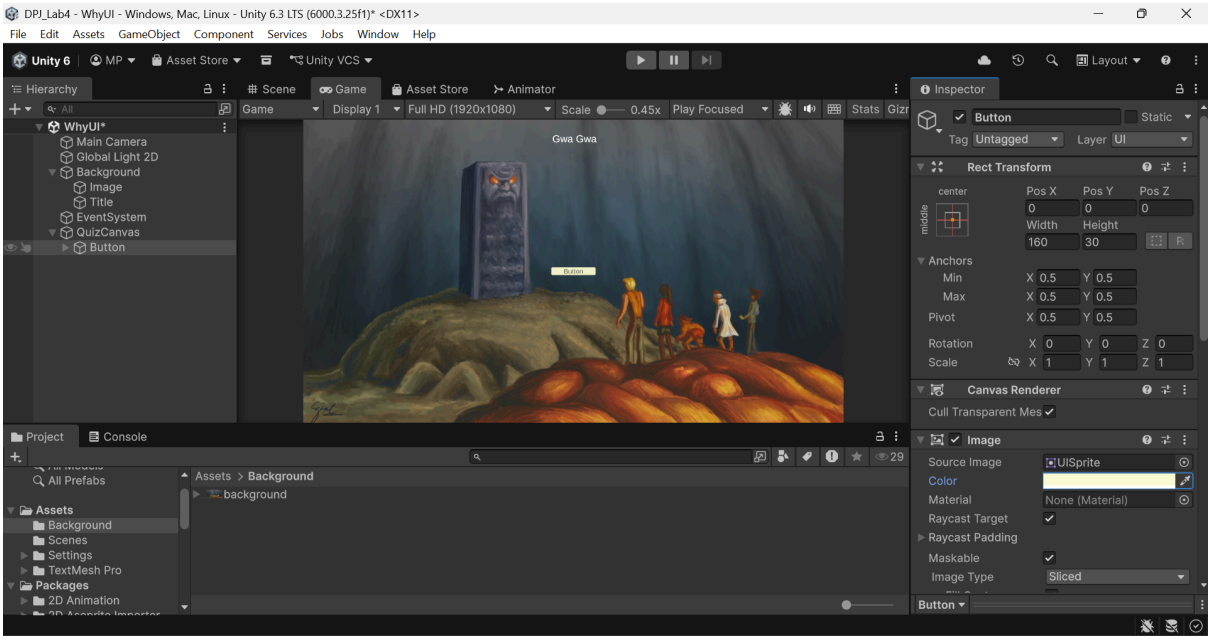

Mário Pedro, Rodrigo Roboredo DPJ

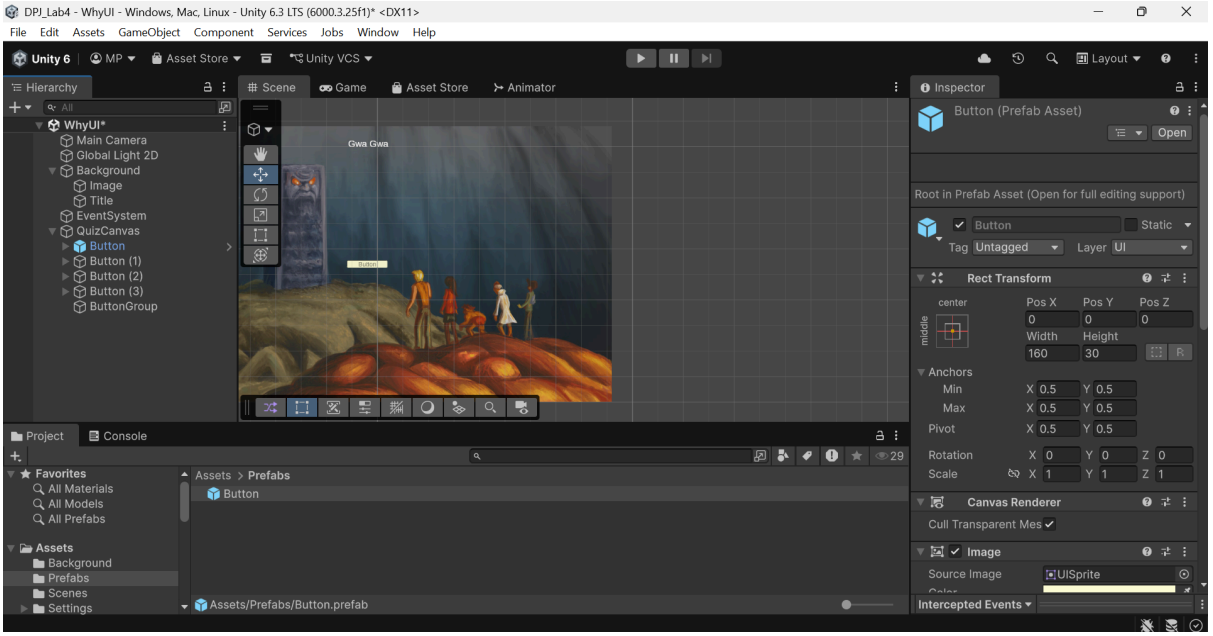

Level 1

First we created the project, then after that we altered the name of the game scene to “whyUI” then we put an image as the background

Level 2

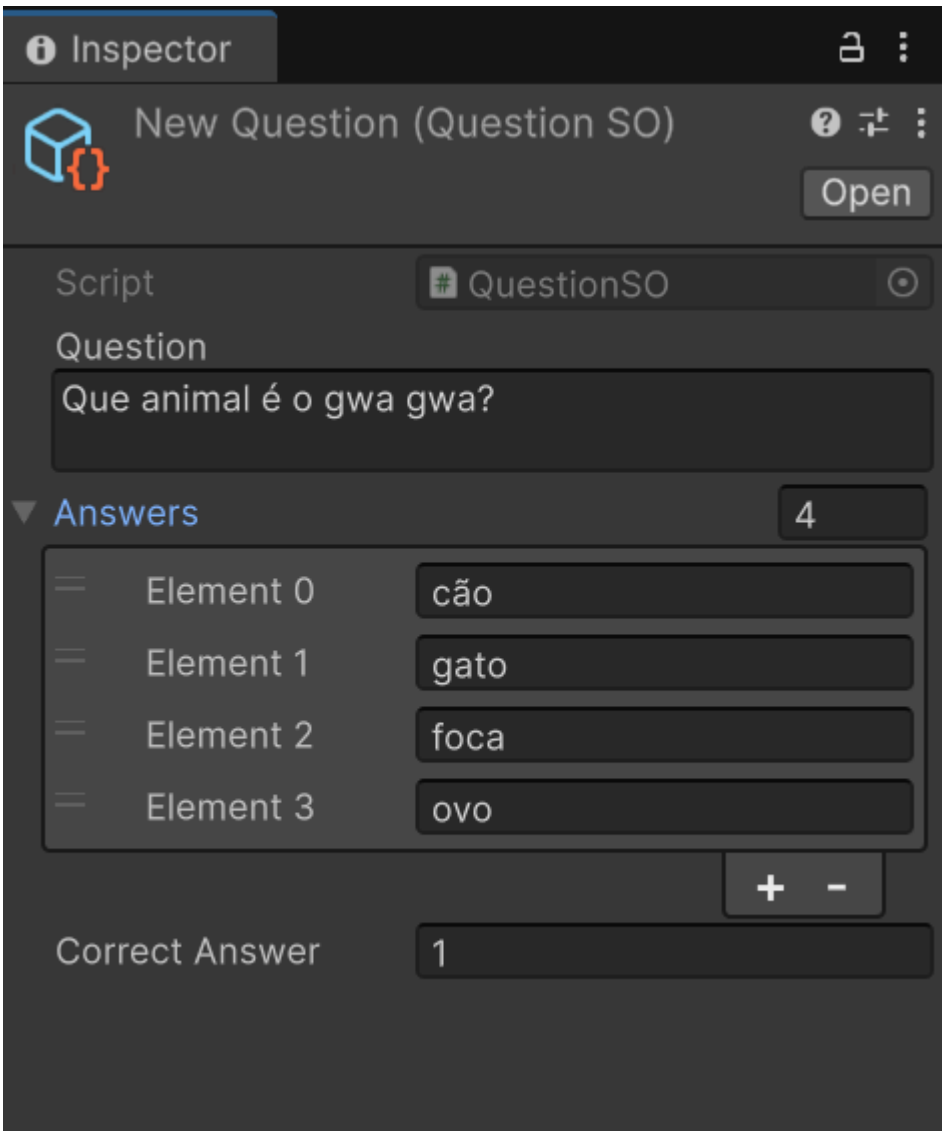

```
public class QuestionSO : ScriptableObject
{
    [TextArea(2,5)]
    [SerializeField] private string question;
    [SerializeField] private string[] questionArray = new string[4];
    [SerializeField] private int answer;
```

Level 3

```
0 referências
public string GetQuestion()
{
    return question;
}
0 referências
public int GetCorrectAnswerIndex()
{
    return answer;
}
0 referências
public string GetAnswer()
{
    return questionArray[answer];
}
```

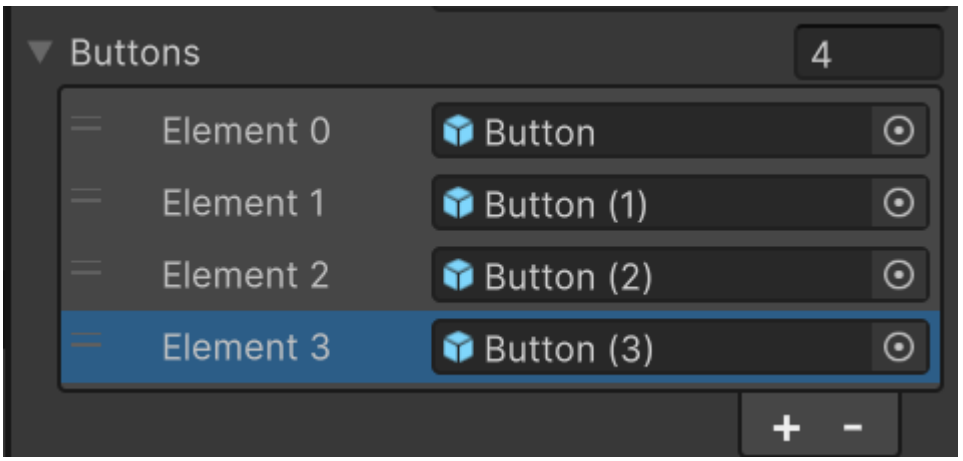

```
public class Questionaire : MonoBehaviour
{
    [SerializeField] private QuestionSO questionSO;
    [SerializeField] private TextMeshProUGUI questionText;
    [SerializeField] private int correctAnswerIndex;
```

```
void Start()
{
    questionText.text = questionSO.GetQuestion();
}
```

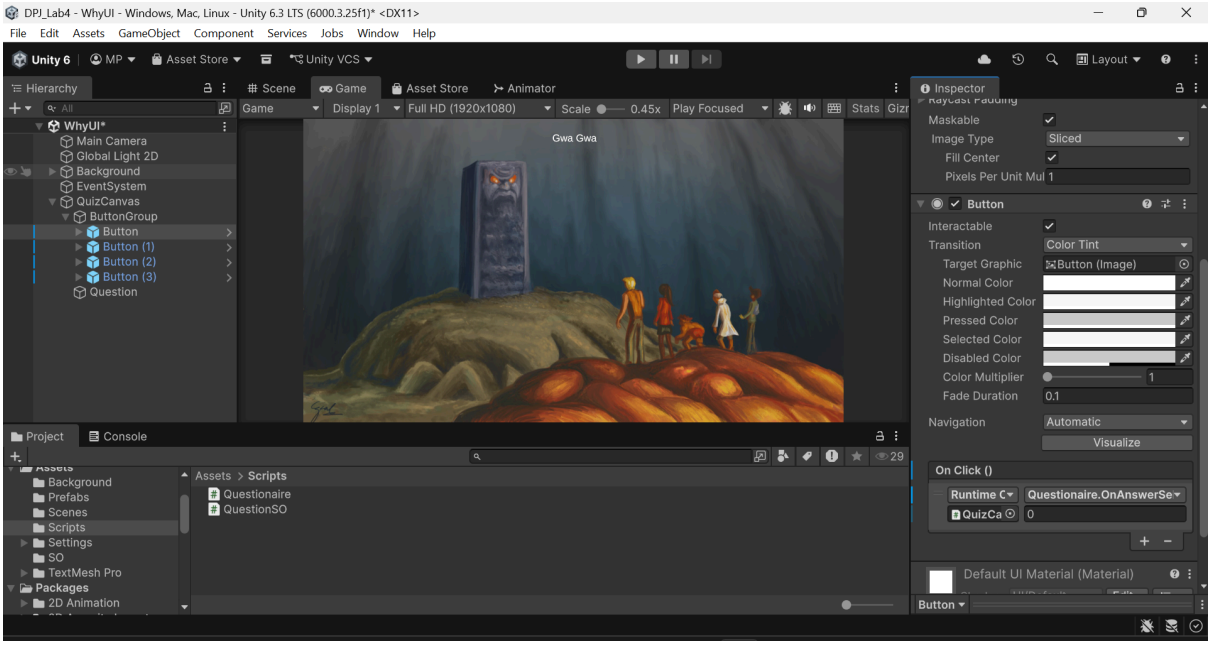

Level 4

```
[SerializeField] private QuestionSO questionSO;
[SerializeField] private TextMeshProUGUI questionText;
[SerializeField] private int correctAnswerIndex;
[SerializeField] private GameObject[] buttons;
```

```
questionText.text = questionSO.GetQuestion();
for (int i = 0; i < buttons.Length; i++)
{
    TextMeshProUGUI text = buttons[i].GetComponent<TextMeshProUGUI>();
    text.text = questionSO.GetAnswer(i);
}
```

```
public void OnAnswerSelected(int index)
{
    if (index == questionSO.GetCorrectAnswerIndex())
    {
        questionText.text = "Correct";
    }
}
```

```
public void DisplayQuestion()
{
    questionText.text = questionSO.GetQuestion();
    for (int i = 0; i < buttons.Length; i++)
    {
        TextMeshProUGUI text = buttons[i].GetComponentInChildren<TextMeshProUGUI>();
        text.text = questionSO.GetAnswer(i);
    }
}
```

```
public void SetButtonState(bool state)
{
    for (int i = 0; i < buttons.Length; i++)
    {
        Button button = buttons[i].GetComponent<Button>();
        button.interactable = state;
    }
}
```

Level 5

```
public void GetNextQuestion()
{
    SetButtonState(true);
    DisplayQuestion();
}
```
